RMM Achieves Cisco Specialization for Advanced Wireless LAN Services

Wausau, WI – 06-15-2010 – RMM Solutions announced today that it has achieved the Advanced Wireless LAN Specialization from Cisco®. This specialization recognizes RMM as having fulfilled the training requirements and program prerequisites to sell, deploy and support advanced Cisco Wireless LAN solutions.

“As an advanced technology solutions company, our customers depend on our expertise for both design and deployment services,” states Rimon Moses, CEO of RMM Solutions. “Our team of certified Cisco engineers have not only completed the required training, but have implemented advanced wireless solutions in several of our local markets. I am extremely proud of their accomplishments, and look forward to our ability to bring Cisco Advanced Wireless LAN to our clients on a much broader scale.”

The Cisco Advanced Wireless LAN Specialization is designed to help channel partners deliver the wireless solutions their customers need to increase their productivity and responsiveness, extend applications beyond the wired network, and overcome obstacles encountered with traditional wired communications. Cisco Advanced Wireless LAN Specialized Partners are able to build solutions based on the entire suite of Cisco wireless LAN products, including Cisco access points, Cisco Unified Wireless LAN Management solutions, Cisco Wireless LAN Controllers, Cisco wireless bridge solutions, Cisco wireless LAN client adapters and Cisco Unified IP Phone 7900 Series handsets.

About RMM

RMM Solutions provides world-class technology, designs and implements IT infrastructures, data/document management, services and customized business solutions that empower businesses and organizations both large and small. As our business and the industry mature, we continue to focus on a solutions-oriented approach, streamlining internal processes and workflows, ultimately enhancing the customer experience through business transformation. Our services include networking, document management, IP telephony and communications, video and web conferencing, disaster recovery and continuous data protection and ProActive IT.
