Dr. Lance Ford to Discuss Cisco's Human Network at RMM Solutions Technology Fair

Wausau, WI – 03-21-2011 – You've seen it advertised on TV - Cisco's commercials about the "Human Network". Now see it in action.

RMM Solutions is proud to present Dr. Lance Ford, Adjunct Faculty at University of Maine and special guest speaker for Cisco, as the 2011 keynote speaker at RMM Solutions Technology Fair. Ford will discuss how video conferencing can help businesses stay connected via the "Human Network."

School districts, businesses, government and organizations are challenged financially to balance their budget. The use of smart technology can stretch resources and help grow your business.

- School Districts can leverage video conferencing to teach a class in Spanish through a sister school in Mexico
- Radiologists can view images via a video conference link while consulting a specialist
- A Human Resource Director can interview candidates at remote offices
- Executives can meet face-to-face without ever leaving their desks
- An insurance company can train new hires remotely

"When we present a keynote speaker, it is critical their material and experience exceed attendee expectations and provide our customers with industry knowledge to help them in their business planning. The "Human Network" keynote session will offer attendees a comprehensive understanding on how smart technology can help a business grow," said Rimon Moses, Chief Executive Officer, RMM Solutions.

RMM Solutions Technology Fair takes place on May 3, 8:00 a.m. – 4:00 p.m., at the Jefferson Street Inn, Wausau. For more information, visit www.rmmsolutions.com or 715.848.3292, ext. 314.

About Ford

Dr. Lance Ford, Adjunct Faculty, University of Maine, Farmington, Howe, Oklahoma, Dr. Lance Ford is an educational technology advocate for Cisco. Prior to Cisco, he served as technology facilitator/coordinator for Howe Public Schools in Oklahoma. Lance focuses on helping students attain their maximum potential through personal interactions made possible with technical tools, by enabling them to access, synthesize, and present materials to colleagues in an engaging and interactive fashion.
